

The North Remembers

Part 1:

Kajon väkeä, sinen kukkia

**We are older than all the gods
the dead and the never-born.**

Hello's to all of you's around the world's1!! It has come time to chew bubba gum and make some sweet science. And I am all out of gum. Additionally, one could surmise that I have ever been bereft of science also. Luckily, that is but an optical illusion! Have fun reading, and be seated – surprises available for every cunning linguist!

“You better / Hoist your sails and pray for the gods of wind / To blow us all”

edit 2026-04-19: Hehee, anniversary of this project, here you go, more to follow, thanks for the encouragement!!1 30 cognates so far? I am not sure because it's hard to count. Only a tiny slice of the alphabet done. Expect some paradigm shifts in the next list of h0t sh1tz0r!

edit 2026-05-03: Wtf, much time gone, what happen? I guess I gotta take more care of my fluid balance while biking. Here are more, about 80% of stuff still to come, hehhehee, but hopefully this will be “kinda interesting” also!

Finnish	Proto-Yukaghir	PKY
hyttynen	*kiče:	*tʰuttʰu:ŋ
hyttinen	*kuče:	with midges
hytikkä		PY
hytykkä		*tʰu̯t
mosquito	mosquito	swarming insects

dry snot

Finnish
anteeksi
(I am) Sorry

SKet
áŋtetkísavet ke't
tormented person

Proto-Finnish
***rak'as**
beloved, dear

Arin
berekšetü
I love

Proto-Finnish
***tumma**
dark

PY
***t^hū·m <**
***t^humaŋ**
black

Finnish
tumma iholtaan

PKY
***t^hū·m-igoltü:ŋ**

dark – skin (+ -lta, ablative
suffix + -na, 3. sing.
possessor suffix)

tūm + igol +
čouŋ
black + skin +
adj. suff.

dark of skin (3. sg. poss)

Finnish
kultu
dear
kulta
dear (or gold, but.. this is
more like it..."You are my
road" get it? <3)

Ket
kultu
beard
kulta

road

Proto-Finnic
***hoomēn**
morning

PKA
***t^human**
tomorrow

Finnish
huomenna

PKA
***t^human**

An old (consonant-stem)
locative singular (essive)
case of huomen (“morning”),
tomorrow

tomorrow

Proto-Uralic
***tumte-**
to know

Yugh
***tū·nʲ**
feel jealous

Proto-Finnic
***koohi**
to geld
to castrate

PY (S)
***qopt-**
castrated ox

OKet
***qopta**
castrated ox

Proto-Finnic
***koohu**
foam
froth
spray

PKY
***qoptneŋ**
foam
spray

***qo:pneŋ**

Proto-Uralic
***kompa**
wave

PY (S)
***χɔpVr**
foam

PY
***qopʰʌʌ**
foam

***qapʰʌʌ**

Nganasan
koŋxu
wave

Proto-Uralic
***mäxe**
earth
land

muuntua

change (intransitive)

Ket

ben

incorporate in the
verb
S changes /
becomes different

Next pageZ: Uralic and Yeniseian languages are related. Bold claim!! Even bolder claim: The conneXion can be found via Hungarian / Kamassian / Mator / Nganasan – a missing linkz0rz. Check out the “irregularities” which again are just sound laws that nobody has bothered to find out because everybody knows that they are not related at all.

=====8DDDDDDDDDDDDDDDDDDDDDDDDDDDDDDDDDDDD!

Proably Ainu, Japonic, Tungusic, Turkic, Mongolic, Nivkh, Chukotko-Kamchatkan etc. can be connected to the mix. Some of those featuring in the SKIN part.

Sorry for the shit layout. I will make it better when I have some time. Prolly you can still make out the details. Tip: screw the numerals and other stuff developed for shallow Proto-Indo-European time depth. This stuff is thousands of years older. So it is quite ironic that I am writing this in English?! 11+1?!

And of course this means that Uralic languages are also distantly related to Northwest American languages. Eeehhh! What could be cooler?++!?!+ fine, probably this
<https://www.nature.com/articles/s41586-023-06557-9>

I GOT WOOD

	Fin nish	Proto- Uralic	Proto- Samoyedi c	Hu ngan	Ka masian	Koi bal	Ma tor	Kara gas	Tay gi	Ngana san	Proto- Yeniseia n	Proto- Yukaghi r	Proto- Tungus ic	Proto- Na-Dene

------	---	--------	---------------------	------	------	---	-------

*šejg
'four'

First regular sound change (I have a ton but try to find some yourself, it's quite fun 8))

(Well ok the *first first* here is **PU** /m/ == **PY** /b/ but Vajda said already in 2024 “*Though nasals were absent word-initially in PY, morphophonemic evidence suggests word-initial *m and *n became *b and *d at an earlier stage of the language.*”. Luckily for me he did not posit that the language mentioned is the ancestral language of both Uralic and Yeniseian languages.)

	Finnish	Proto-Uralic	Proto-Samoyedic	Hungarian	Tundra Nenets	For Estonian	Kamchatkan	Koibal	Matoran	Nganasan	Proto-Yeniseian	Proto-Yukaghir

SKIN, FUR, AND FEATHERS =====%D

One more for the road:

Finnish:
kuolettaa

Proto-Yukaghir:
2053. *qo:ləw-
T qoolew-, quolew- to kill

Burushaski:
qhúun -t-

№	English	Siouan languages						Pawnee (heur)	
		Yankton- Yankton							
		Santee		Sisseton	ai		Crow		
		Lakota	Dakota	Dakota	Dakota	Osage			Tutelo
							kite, la(ka)tskih		
	110 to kill	kté	kté	kté	kté	ts'éthe	a	dappeé	kuutik

Proto-Yeniseian:
*qo: < *qo'ʌ / *qoɣʌ < *qaɣʌ
PY (S) *qõɣV (~ ɣ-,ɔ-, -ɣ-)

to kill

HAIDA
k'ut'álgan

Crow – dappee & Finnish – tappaa, curious!

----- → No niin, nyt maate... hmm... what could that implicate.....

*So, if you wanna travel along with me
You better sleep tight the rest of the day
You see, I could be a sleeper, it's not rest I lack
'Cause I hit the sack when the sun's coming back*

I'd Do Anything for Love (But I Won't Do That)

Since grammatical connections are the top of the tops, here are kinship words. A great sociobiological technology to reduce inbreeding, very useful in small populations.

PDY	*ļejn-ej	‘son-in-law’;	PU	*wājew / *wājwe	
			PU	*miñä	
			PU	*pojka	
PDY	*gaj-ej	‘parent’s sibling’;	PU	*šečä	
			PU	*nejde	
			PU	*näjte	
			PU	*äjjä	
		‘parent’s elder sibling’			
PDY	*web-ej		P-Samic	*eanōj	maternal
			P-Finnic	*tüttöi	uncle

Note how in Proto-Uralic and some daughter languages, all kinship words have either -w or -j / -i in some form, except ***šečä**, but I will come to that later.

In Proto-Finnic, if we suppose “daughter”, *tüt’är, is a loan from an Indo-European language, the form *tüttoi should prove the kinship suffix was still partly productive at that point in time.

Must be a coincidence. More will follow. Get your Lotto sheets ready.

Fine, one more. Three “coincidental homonyms” betwixt Yukaghir and Finnic! What are the odds!

Mechanism in short: debuccal. in PYuk, j ↔ g, metathesis, first vowel rises a-u. CU again soon<3

Proto-Yukaghir

*öyur

K ugur **spine, ridge**; KJ ugur

K ugurčə **ski with fur on the bottom**; KJ ugurče; SD ugurce; T ugurče foot;

shoes, boots; TK ugurt’e + leg; TJ ugurče; TD ugurče, -uogurče

K ugurče: **grayling** (*Thymallus*);

Proto-Finnic

*harjus **grayling** (*Thymallus thymallus*)

*harja **mane / bristle / crest, comb / brush / ridge (of a roof, a hill)**

(Yes I know, “Borrowed from Proto-Baltic”. but I would not bet on it any more... ;P)

Swadesh lists are useful and the concept is nice, especially considering that Wikipedia says “The Swadesh list was put together by Morris Swadesh on the basis of his intuition.”. Hee hee! What an awesome dude <3

He worked mostly in the warmer regions of the world, including tropics. Lucky chap! Now I do not want to nitpick but the list shows some preference to non-colder regions of the world.

This presents certain challenges in using regular Swadesh lists as tools in comparing the more northern languages. As a amusing side note, the new and sexy Leipzig–Jakarta list to test the degree of chronological separation of languages **does not even have the word “cold”** in it, whereas when I go to Wiktionary’s https://en.wiktionary.org/wiki/Appendix:Proto-Uralic_reconstructions I can get 23 hits on the page with the word “snow” alone. I reckon this is a sufficient demonstration that a new Swadesh list fine-tuned for north would be useful, or at least it is understandable when I say that I’d better make one instead of continuing to complain here... Up and coming next! SeeY’All!?

```
