

The North Remembers

Part 1:

Kajon väkeä, sinen kukkia

**We are older than all the gods
the dead and the never-born.**

Thank you for your interest! I will try to publish more asap. About the author on the last page. Let's get to business first. Perhaps you already figured out some languages that are in the mix. An unintentional puzzle as a side effect of not having time at all. Here are some fun cognates. More l8r. edit 2026-04-13: 1900 reads! I appreciate you all and I am flattered! I should have gone to sleep already but you made me quite happy - here are some more!

Finnish	Proto-Yukaghir	PKY
hyttynen	*kiče:	*tʰuttʰu:ŋ
hyttinen	*kuče:	with midges
hytikkä		PY
hytykkä		*tʰu̯t
		swarming
mosquito	mosquito	insects

Proto-Finnic	Proto-Yukaghir	OKet
*oja	*oj	*oga
		portage
		(carrying place
		between two
		navigable bodies
ditch	to leave a road	of water)
brook, stream		

Proto-Finnic		PKY
*tuulas		*dʲu:dʲ
night fishing		
(with a torch		fish at night by
and a spear)		torchlight

Proto-Finnic	Proto-Yukaghir	Kott	Karaim	Yakut
*sokēda	*soqo:r	*sugur	sogur	soxxor
blind	T soquor blind	one-eyed	blind	one-eyed
	T soquortege pr.			
	(a one-eyed			
	reindeer)			

Proto-Uralic	Proto-Yukaghir	PY
*kaja	*čajlə	*kʌ'n
*koja		light
dawn	day	*kʌnigʌ
	light	daybreak
	T čajler-	
	to dawn	

Finnish	Kolyma Yukaghir	Ket	GOINSI DENSE.	SK
kuorsata Onomatopoeic	joyuh-qoqšəš- to snore [lit. to strangle with a nose]	*kuurej to snore		quurej to snore

Proto-Finnic				
*kurgista-	*qyqsə-	---		
*käk'istä-				
choke	to choke			
strangle	to groan			
	to strangle			

Proto-Finnic
***korisē-**
to wheeze
to growl
to rattle

Finnish		OKet	ONOMA TO POETIC.
kakoa		*k-a	
to gack		choke	
to gag			
to retch			

Proto-Finnic		PKY	CONDIN SENDE.
*katkoi-		*k-a	
transitive		to cut off	
to break			
to snap			
to tear			

Finnish

Ket

TOTAL
GOINSE
DENCE,
SOUND
SYMBA
LCI
ALSO.

tökätä

k-tät

to poke
to jab

to poke (using
an object)

And then... a
morbid surprise
for everyone
must be a
coincidence...
right...?

Ket

kolij
to beat up

Finnish

to beat to death

kuoliaaksi

tkoolijooksa

Translative
singular form of
an adjective
THAT DOES
NOT EXIST AS
AN
INDEPENDEN
T WORD AND
IS ONLY
FOUND AS
THIS
COMPOUND

...
meaning "until
something or
someone is
dead" e.g.
"aurattaa
kuoliaaksi" "to
make someone
laugh until they
are dead"

"he beats him to
death"

Maybe it is an onomatopoetic
coincidence.

But at this point I would like to
say that "It certainly appears
that the perceived realizations
of experienced sound spaces
are rather uncannily similar
between speakers that
represent these two TOTALLY
UNRELATED LANGUAGE
FAMILIES WHERE THERE
IS NO BORROWING."

Finnish Saimaa The largest lake of Finland, and fourth in Europe. Etymology unknown. Or, has been...	*sajmā seine-net	Ancient Greek σαγήνη (sǎgéné) seine	Ancient Greek σάγουρον (ságouron) net
---	--------------------------------	---	---

And then! Something fun for the ending!s

Finnish mäntti mook	Kott muntur fool
----------------------------------	-------------------------------

Finnish mömmö sludge ooze muck goo	Ket mamas dry snot
--	---------------------------------

And something polite, and lovely also <3 nice folk those ancients, amirite??

Finnish anteeksi (I am) Sorry	SKet ántetkísavet kε't tormented person
--	---

Proto-Finnish *rak'as beloved, dear	Arin berekšet'u I love
--	-------------------------------------

More to come, when I have time... drop me a line or two if you think this shit is the bee's knees!

Next item on the list:

LATEX, FUR, AND FEATHERS

no wait sorry I meant SKIN of course this is the Neolithic...
what was I thinking... I must've been crazy....

I'd Do Anything for Love (But I Won't Do That)

Since grammatical connections are the top of the tops, here are kinship words. A great sociobiological technology to reduce inbreeding, very useful in small populations.

PDY	*ļejn-ej	‘son-in-law’;	PU	*wājew / *wājwe	
			PU	*miñä	
			PU	*pojka	
PDY	*gaj-ej	‘parent’s sibling’;	PU	*šečä	
			PU	*nejde	
			PU	*näjte	
			PU	*äjjä	
		‘parent’s elder sibling’			
PDY	*web-ej		P-Samic	*eanōj	maternal
			P-Finnic	*tüttöi	uncle

Note how in Proto-Uralic and some daughter languages, all kinship words have either -w or -j / -i in some form, except ***šečä**, but I will come to that later.

In Proto-Finnic, if we suppose “daughter”, *tüt’är, is a loan from an Indo-European language, the form *tüttoi should prove the kinship suffix was still partly productive at that point in time.

Must be a coincidence. More will follow. Get your Lotto sheets ready.

Fine, one more. Three “coincidental homonyms” betwixt Yukaghir and Finnic! What are the odds!

Mechanism in short: debuccal. in PYuk, j ↔ g, metathesis, first vowel rises a-u. CU again soon<3

Proto-Yukaghir

*öyur

K ugur **spine, ridge**; KJ ugur

K ugurčə **ski with fur on the bottom**; KJ ugurče; SD ugurce; T ugurče foot;

shoes, boots; TK ugurt’e + leg; TJ ugurče; TD ugurče, -uogurče

K ugurče: **grayling** (*Thymallus*);

Proto-Finnic

*harjus **grayling** (*Thymallus thymallus*)

*harja **mane / bristle / crest, comb / brush / ridge (of a roof, a hill)**

(Yes I know, “Borrowed from Proto-Baltic”. but I would not bet on it any more... ;P)

Swadesh lists are useful and the concept is nice, especially considering that Wikipedia says “The Swadesh list was put together by Morris Swadesh on the basis of his intuition.”. Hee hee! What an awesome dude <3

He worked mostly in the warmer regions of the world, including tropics. Lucky chap! Now I do not want to nitpick but the list shows some preference to non-colder regions of the world.

This presents certain challenges in using regular Swadesh lists as tools in comparing the more northern languages. As a amusing side note, the new and sexy Leipzig–Jakarta list to test the degree of chronological separation of languages **does not even have the word “cold”** in it, whereas when I go to Wiktionary’s https://en.wiktionary.org/wiki/Appendix:Proto-Uralic_reconstructions I can get 23 hits on the page with the word “snow” alone. I reckon this is a sufficient demonstration that a new Swadesh list fine-tuned for north would be useful, or at least it is understandable when I say that I’d better make one instead of continuing to complain here... Up and coming next! SeeY’All!?

```

*****
*
* Author says a few things about self and other stuff:
*
* I STILL have hundreds of putative cognates, hee hee! More to come eventually.....
* when I can... but they will be so HOT everyone will be saying OOH THAT IS SPICY!
* What I do not have is time nor money. But I will try to have some quality of output to
* make my results easier to follow and falsify if possible.
*
* If falsification proves to be unsuccessful, a discovery appears. World is transformed. Nice!
*
* I am quite unknown in linguistic circles so my hope is that this publication will annoy
* everyone equally and thus have a higher chance of eventually being grudgingly accepted .
* Everyone was right and wrong. Science wins!
*
* If you are loaded and want to change the history as well as the future, here's a good chance.*
* I will setup Monero as soon as possible but I haven't done it yet!!! If you wanna donate and
* help me or just to cheer, mail me something sweet or aim a kick of $$$ at my butt so I will
* get to setupping a donation channel!!
* Have a nice day?!?!?1+1+1+1+
*
* P.S. References are STILL nonexistent atm. I == asshat. But they will come.
*

On all of the maps

Everybody knew

there is nothing there

during my nighttime strolls

I had seen
syli
oksa

Still, I pressed on

I climbed along the words of my ancestors
of songs heard in my childhood

my grandmothers reading poems to me

speech of friends
when I was a young adult

strangely pronounced words
spoken in haste, sad, drunk, or in rage

jokes, riddles
speech and sounds made for other animals than humans

and reached a summit, a peak
from which the sun shone
and stars revolved around in their eternal course

open to the north
midsummer sun visible

first there was nothing
but I knew that there must be something
I pressed on

03:40?

it's there
it is there
an invisible thread

glinting only when the light hits it at a certain angle

not colours
not shapes

but the thought behind them
a way to see the world
a shared experience

what it means
how it feels
to be a human
and live here
up north

bridge made of thoughts
a net of words and whispers

then I knew it
as I had known before
but even more powerful now

flute and the kantele
throat-singing and beating of drums

there was still a connection remaining
an invisible bridge
made of the gentlest of threads
of breath and whispers
of songs and curses

joy and lament

of those that have gone before us
gone now for millennia
their names forgotten
their villages

their blood taken back by the ground

but still
their voices remain
the
harmony
continues
with their

but still

it was still possible to reach into the void

to spread my wings of words and whispers
and fly to another world
an ancient dimension

it was still possible to reach into the void
and return with something new
even after these thousands of years
even after the forceful genocide imposed by indo-europeans

we were still remaining

we still existed
clinging to lifetime

it was not too late
there was still enough of the old ways

not words
but sounds
how the speech had transformed
and how it had not

love and wrath
luck and ruin
ruin and luck

I sat there and waited
for many moons
slowly, surely

bond of snow
bond of summer
bond of light
bond of darkness

day of two months
and the ever-night

existing before humans climbed down from the trees

when the first humans came
and saw the ever-night
most of them left when the sun returned again
some of them did not.
this is a story of those.

We have always been here
when the first star shone to a sea formed of melting glaciers
we were there
when the first tree started to grow after aeons of ice
we watched it grow

when the first birds returned to north
we thanked them and partook of their eggs

we thanked them of their helpottamiseksiso we could continue

no other humans anywhere, until the horizon curves out of sight

no sun for weeks and weeks
only light is the deep blue glow until the voi

bathes in the void once again

We have always been here.

being an uncultured uralic, I only know Mandarin Chinese

I thought it interesting to try to create a new field of study.

Small but strong

they have superior technology, such as bows and metalworking

they are accepted as the new bosses of the population

however, they are few in number and cannot teach their own language 1:1 to all their descendants.
the result is a new language, where

most of the ancient structure is intact such as

- cluster prohibition
- suffixes
- no “to have”

the phonetic environment is very heavily modified, labials gone, velars added

the verb structure is totally remade according to the local tradition

then, after some hundred years, perhaps more

some of them decide to return to check out the old world

y-chr does not show this, because Q1 was the ancestral line at -12000 years, so even if the returning population would have males from original NA and newcomer lineage, it looks like the same in genetic analysis

but mt-dna shows this, since there is a female lineage especially spawned in NA, and few people in Asia also carry it

ensin yeniseiliike

part enhanced, part subsumed

no gods no masters

no fate but what we make

Starostin was right – they are all connected

More stuff on that in my next publication. So much to write in one lifetime.

everybody has been partially correct, but mostly in the wrong.

perhaps it will help that I do not know anyone
inside the linguistic circles and I have come to my conclusions practically
alone, just by thinking and reading
what others before me have thought.

Equally helpful has been that I have

I have somewhat escaped being
preconditioned to a certain mindset where

something is acceptable and something else is ludicrous by design
renegade thoughts subsumed into an enhanced reality

So my hope is that this publication will annoy everyone equally.

a bright low light of the first spring sun

but we are all walking in the same direction

so the light will

everyone is equally annoyed
but the new light is not too bright for anyone

the new light is not too bright,

instead able

but the new light is able to illuminate if one wants to see

not too bright for anyone

It is very interesting. I personally think it is also true. But th

there are always fine details.

Splits - who, what, when, where, why?

Difficult questions.

I will begin answering them by proposing a fresh perspective

U

Sounds implausible. But first, something to plant the seed of doubt to the mind of the reader.

The U-Y connection has never been examined, so there has been no opportunity to find anything

Thus, even the shoddiest daydreamer

can

simply by the virtue of being the first,

uncover something real that has lain hidden for aeons.

And by following an established scientific methodology, the results

can even be made
perturbed

This is a story of

persistence

virtues of life around the Arctic Circle.

Personally atm I think Merritt Ruhlen and Sergei Starostin were right. It is possible to reconstruct almost anything as long as there are enough pieces.

Example -
an ancient mosaic, tens of square meters
shattered into tens of thousands of pieces.

by looking at the individual colours, we might put blues in one pile, reds in another, yellow there and so on.

Then the jagged edges and colours fading into another across the pieces.

but eventually there will be pieces that do not fit, or, would fit into more than one place.

with a powerful microscope
examine the very material
beneath the colourful surface.

we would begin to see contour lines where the hand of the ancient mason has swept across the picture
small rocks embedded into the superstructure that guided the flow of cement
some tiny knobs where the mosaic was put a little bit slanting so that in a certain light, a three-dimensional effect would be created
and we would not even expect to find such an image because we have restricted ourselves to thinking that all ancient pictures are two-dimensional.

imho science is the best kind of competitive sport because if someone wins (and enough agree, of course :P), everybody wins in the end

and the race never stops. it just gets more interesting with every lap.

I think it would be extremely interesting to have a TV series about different weird etymologies.
There is so much human interest to go on:

sex, profanities, weird hobbies, odd tools, and did I already mention sex? Before TV, people had many other hobbies!

Chapter 1:

who, what, when, where, why?

Altai mountains
PIE colony, Botai
horsemanship DOM2

this fits the domestication of the auroch, but it does not fit the domestication of the horse.

in addition, population density. no use for chariot-travelling warriors because there was nothing to gain from fighting. no population centers, no cities.

ox carts were a good method for colonization. slow travel, lots of luggage. move on to the next area, put a kurgan there to sign "this is our land". repeat.
only when the plain is full of towns and cities, it becomes relevant to muster an army

https://en.wikipedia.org/wiki/Bullock_cart

I have understood that displaying

On a chance happenstance
I found starling.db

tree = oksa
hmm, I thought, for an Uralic person this is peculiar

and I decided to check a few more words
just randomizing what could be relevant for a

“What would be important”
and as a recent father

one of the words was “syli”,
süli
culture

I have to say that
it is great for spawning ideas

it does not have to be exactly correct in the end
it can still give a fresh perspective

show a light when there were none

writing is only a method to

how it sounds in real life

would it be close enough for a native speaker

is there a connection

the flow of the word

the stops, affricates, plosives, gutturals

inlaut clusters

is there enough in the background

to make a connection

“

As far as we are concerned, no one is obliged to have attended the best universities in the world and written PhDs in order to earn the right to do comparative linguistics, but one certainly IS obliged to have a good understanding of the classic comparative method and be at least moderately well versed in the current state of linguistic studies.

“

best, of course, would be that everything is in audio as well as transcribed.

and the transcription is done unambiguously

without any “oh we use d for ð because historical reasons” weight... I am looking at my own kin here... “d” is a Swedish corruption. the real character would be ð like it has been for thousands of years. but for our (inclusive) pleasure I cease and desist this digression before it diatribes 8D

I reckon a modified swadesh list could be interesting to cross-check.

e.g. there is “cold” on the swadesh list – nice!

But there is no word for snow. I trust this example is enough to

I wish that this would annoy everyone equally

“3.1.4. I find it obvious that Armenian (Hebrew, Japanese, Zulu, etc.) was the proto-language of humanity. Why aren't you paying attention to me?”

8DdDDD

this is not of the type

“sauna” shows that all languages are closely related to Finnish.

q - s

none of the daughter languages of PY show q-s-transition

however, it is present in some na-dene languages.

3) Comparative linguistics tends to take as much data as possible into consideration; ideally, the system of intermediate and final reconstructions should be able to account for all the language material that is documentally witnessed.

some of the material ends on PF / PFP level

but the material that does not end, is similar from F to PF to PU to PY to XYZ.

microcomparison

macrocomparison

something betwixt but not between

Kinship suffixes

Low population density, very useful sociobiological technology to complement the Westermarck effect, also known as reverse sexual imprinting.

Populations which employ some kind of kin detection techniques should have, on average, better fitness than same-sized populations which do not.

Wild theory:

before 100000, fathers did not exist. What I mean with this is that cryptic ovulation, long gestation time etc.

people did not know how babies are made. Women gave birth and all were astounded because more life is nice.

Only when somebody found out all went to shit.

→ all languages that have the word “father” and have b or p in it, have gotten the dad news from GT people.

History

The first indications of the use of a [wagon](#) (cart tracks, incisions, model wheels) are dated to around 4400 BC[[citation needed](#)]. The oldest wooden wheels usable for transport were found in southern Russia and dated to 3325 ± 125 BC.[1] Evidence of wheeled vehicles appears from the mid-4th [millennium BC](#), between the North Sea and Mesopotamia[[citation needed](#)]. The earliest vehicles may have been ox carts.[2]

An ear for fear hear

Nowadays, the word for “ear” in Finnish is “korva”. It is an innovation, however, since in Proto-Uralic the word for “ear” was “peljä”. Interestingly, a dated form for “to fear” is “peljätä” (regular form “pelätä”).

2023 uralic languages nganasan

2 The lative form of the noun hūə ‘year’ means ‘usually, always.’

kun kerran täällä ollaan niin ajattelin tyhjentää pajatson

there

has not been much research done about the subject.

I am quite sure that had Castrén lived, he would have come up with this.

Basically, finding

it required

- 1) a native Finnish speaker with some linguistical curiosity
- 2) a decent dictionary with enough entries.

Probably the same could have been achieved with native speaker of another Uralic language.

Syksyllä 1849 hän luennoi yliopiston kirjallisessa illanvietossa suomensukuisten kansojen alkukodista, jonka hän kieli- ja perinneaineiston vertailevan tutkimuksen perusteella sijoitti Altain vuoriston vaiheille. Todisteina oli muun muassa vesistönnimiä, esimerkiksi Jenisei-joen paikallinen nimitys Kem, joka Castrénin mukaan rinnastui Kemi- tai Kymi-nimiin. Suomalaisia vastineita löytyi myös Jenisein sivujoille Sim, Ija ja Oja. (M. A. Castrén 1849, 140.)

S.488

PPY*!!!!

DL-la’la to speak

<https://en.wiktionary.org/wiki/Reconstruction:Proto-Finnic/lauladak>

Proto-Finnic

Etymology

Not known, but *la-la* is a common element in songs across languages

Verb

***lauladak** (stem [*laula-](#))^[1]

1. to [sing](#)

<https://en.wiktionary.org/wiki/Reconstruction:Proto-Uralic/k%C3%A4le>

Proto-Uralic

Reconstruction

Reconstructed as **keele* in the UEW, mainly on the basis of Finnic. Sammallahti (1988) reconstructs **käxle*; according to Aikio (2012), it is not necessary to posit a separate element **x*, and vowel length in Finnic can be considered the result of secondary lengthening.

Noun

***käle**

1. [tongue](#)
2. [language](#)

<https://en.wiktionary.org/wiki/loka>

Finnish

Etymology

From [Proto-Finnic](#) **loka*.

Pronunciation

- [IPA](#)^(key): /ˈloka/, [ˈlo̞kɑ]
- Rhymes: [-oka](#)
- Syllabification^(key): lo·ka
- Hyphenation^(key): lo·ka

Noun

loka

1. wet [mud](#) or [dirt](#)
 - Synonyms: [kura](#), [rapa](#)
 - ([figuratively](#)) [mud](#) (willfully abusive, even slanderous remarks or claims)

DL-Λ'q **dirt**

K jayil'ńə- to lean against | **T ayaduol', ayaduol, eyaduol'** bank of a lake where
a boat and nets are placed to dry | **TK ayat'i-** to cut skins (several times)

Finnish

Etymology

Probably fronted from [Proto-Finnic *ustava](#) (compare [Estonian *ustav*](#) (“loyal, faithful”)), a
consonant-stem variant of the present passive participle of [uskoa](#) (vowel stem variant [uskottava](#)).^[1]

Alternative theories posit that the word is a reduction of the present passive participle of **üskätä* (“to embrace”, such verb is not attested), or a present active participle of **üstää* (“to want”) (also unattested, < Germanic **wunskijanq*),[2]

MUNTUR
MÄNTTI
<https://en.wiktionary.org/wiki/m%C3%A4ntti>

Proto-Uralic

Alternative forms

- [*mune](#)

Etymology

Probably somehow related to (Northwestern) [Proto-Indo-European](#) **monogʰos* (whence [Proto-Germanic](#) **managaz*, [Proto-Celtic](#) **menekis*, [Proto-Balto-Slavic](#) **managas*), which has sometimes been considered a substrate loan. The Uralic word is possibly from the same source, and if so, possibly borrowed through Indo-European.

<https://en.wiktionary.org/wiki/Reconstruction:Proto-Finnic/coora>

Proto-Finnic

Etymology

Unknown. Possibly a derivative **coo-* + **-ra* from an otherwise unattested root, possibly loaned from [Proto-Germanic](#) **stā-*, **stō-* (“to stand”). In this case the earliest meaning would have been “free-standing, erect”, as is suggested by the further derivative **cooro* (“penis of domesticated animal”). The Germanic etymology is however rejected by LÄGLOS on semantic grounds.^[1]
